

In the Axis group our teacher is Paul. There are usually 5 TAs although this varies throughout the week. We have students from years 9 – 14 and we do lots of learning about life after Woodfield. As well as learning independent living skills in school, we spend much of our time learning the community as we prepare for life beyond school. We have links to local colleges, and students experience learning in this environment during weekly visits. We have outdoor learning lessons in the woods during which time we mix with students from another school. Many students from this class join with the Enterprise Group in order to develop skills for the workplace. We prepare older students for their next steps, working with Connexions, Colleges and Social Care providers to make the transition to the next stage of life as smooth as possible.
