

Class 7 is made up of 8 pupils and 5TA's. Our main area of focus is developing the pupils self-help and independence skills. The pupils have been practicing personal hygiene routines such as brushing teeth, combing their hair, wiping faces and applying deodorant. We have a weekly breakfast club, where pupils choose and make their own breakfast foods and drinks as well as a cooking lesson where we are focusing on the diverse ways eggs can be prepared. The pupils are taught routines such as washing hands and wearing an apron before commencing and helping to prepare foods and wash up and tidy away after. Class 7 are also learning to pack a wash bag and overnight bag with clothing as part of our maths lessons, focusing on quantity. We have also been working on our coin recognition and handling money when going to the shops or the schools coffee shop. This is also encourages the development of turn taking and waiting skills. Class 7 are also supported to transition to different rooms and places around the school grounds.

Some of our pupils are also working with the Work related learning team to wash, dry and fold laundry and to prepare the dining room tables with cutlery and napkins ready for lunchtimes.
